ABOUT US

Arunodaya University believes in imparting education to the students in a comprehensive format while not compromising on the traditional ways of pedagogy which our country has nourished since its inception. It has therefore embarked on a novel concept clubbing the classroom lectures and the industrial element together. This approach lightens up the interest of the students in their respective scope of subjects and that gives a holistic get up to the whole perception of education. The course structure at the University's disposal has been very carefully crafted to incorporate the best practices of the industry and provide the students with the required scope to hone their capabilities.

The course structure has been a genesis of eminent academicians of varied fields. Arunodaya University shall encourage the inquisitive nature in the students and let them the freedom to find the answer themselves with the guidance of the faculties. The University prophesies to inspire the students towards knowledge. In this purview, it has purposefully tied up with the variant industries to let its students have hands-on experience right from the start of their academic session. This nurtures and molds them well into the real world scenario. The large cache of research papers and other learning materials available with the University complements this module. It further extends the same through e-learning materials. Our approach remains convergent with an obvious envisaged goal of producing a competent human resource. We shall remain dedicated to our motto of

“pursuit of excellence, education with a difference.... to provide education by offering unparalleled exposure to develop its students into holistic human being, body, mind and soul”

CHANCELLOR'S MESSAGE

I am a staunch believer in values and importance of Indian cultural value systems and thought processes. The keystone of traditional Indian thinking has been respect for elders, respect for teachers, simplicity, honesty, concern and caring for the weak and the deprived, to believe in doing our karma and not to chase the fruits of our actions and acceptance of victory and defeat in the same way.

It is important that our students have proper value systems, are self-confident, have high self-esteem, have the appropriate knowledge, and are professionally competent so that they can become useful, creative and productive members of society.

For any developing country skills and knowledge are the driving forces of economic growth and social development because of countries with a higher and a better level of skills and knowledge adjust more effectively to the challenges and the opportunities of the world. Hence it is very important that the University focuses on providing skills to the student's community in order to make them employable and help them secure 'dignified and decent work'.

By skill development, we look forward to strengthening the ability of individuals to adapt to changing market demands and help benefit innovation and entrepreneurial activities. Skilled human resource is essential for inclusive growth.

Therefore my vision is to modernize the University by introducing more recent and progressive courses and using the best technological advances and tools to make learning a productive yet pleasurable experience and to deliver skills services training based on factual needs of the students.

MY MISSION: Arunodaya University becomes a world-class university that is sought after by students not just from India but from different countries of the world.

I am sure you will enjoy your stay with Arunodaya family in days to come.

Wish you all the best.

Dr. (Mrs.) Suman Virender Jain
Chancellor

PRO CHANCELLOR'S MESSAGE

Mrs. Ashima Mishra
Pro-Chancellor

I am delighted to introduce you to Arunodaya University, Itanagar, Arunachal Pradesh.

Mahatma Gandhi defined "Education means all-round drawing out of the best in child and man—body, mind, and spirit." This holistic approach to education leads to the growth of the able-bodied, physically strong individual, who have the capacity to think creatively and come up with, "Out of the box" solutions, thereby bring about a social revolution all-round them. At Arunodaya University, we think of education as the means of developing our greatest abilities, because in each one of us there is a personal hope and dream which when fulfilled, can be translated into benefit for everyone.

In the words of Rabindranath Tagore, "The highest education is that which does not merely give us information but makes our life in harmony with all existence." True to the spirit of Tagore, We are focused on our mission of making quality higher education more accessible and affordable so that much more students can pursue their dream of excellence. It's a mission we believe, will help make the world a better place.

What sculpture is to a block of marble, education is to the souls. Every single one of us has something that you are good at. Every single one of us has something to offer. Arunodaya University has been established with the objective of creating social awareness and imparting quality education at all levels from technical to higher or professional education. We also visualized that social transformation can be brought about through the medium of dynamic education. Arunodaya University is ready to create new benchmarks in Education. We believe that you are coming here with many dreams and will help you to bring them into reality.

And you have a responsibility to yourself to discover, what that is. That's the opportunity education can provide" said the former US president Barack Obama, in his national address to the students. We are here to provide all necessary spiritual and material tools to acquire knowledge to help everyone improve the quality of life. We aspire to build a world-class institution committed to excellence in teaching and research in every field of study.

We believe, that the heart of education is the education of the heart. I invite you to join us in this unique knowledge enterprise to discover and to invent, to be aware of your potential and the unlimited opportunities and above all to transform this world.

Wish you success in life!

VICE CHANCELLOR'S MESSAGE

Dr. V N Sharma
Vice Chancellor

Welcome to the land of Rising Sun!

“Intelligence plus character - that is the goal of true education”

Martin Luther King, Jr.

'Arunodaya' a Sanskrit word which means Rising Sun. We, at Arunodaya University, are striving to be the Rising Sun in the lives of our students.

Education is the most important factor in the development of human civilization. Education provides the nation with man powers, promotes national unity and uplifts public awareness. A country needs different kinds of educated people such as Doctors, Engineers, Teachers, Administrative Officials, Economists, Judges, and other technical hands. Education provides the nation with those educated hands. Education promotes national unity, reforms the society and profoundly enhances human prosperity.

Education is not all about studying and getting good marks. It is really a means to discover new things which we don't know about and increase our knowledge. You can teach a student a lesson for a day; but if you can teach him to learn by creating curiosity, he will continue the learning process as long as he lives. A student attains perfection with education, as he is not only gaining something from it but also contributing to the growth of a nation.

The basic purpose of education is not just imparting knowledge as is generally perceived but also to enable students to understand and discover themselves. The student from our University will be in a position to look at the problem from different perspectives and come to a logical solution. This is the orientation that will be given to students. Various dimensions in which University students are expected to excel include innovative thinking, logical and analytical skills, intellectual curiosity, trustworthiness, environment and energy consciousness, ethics and moral values - and while at it, gaining an overall development of mind, body, and intellect. We at Arunodaya University are committed to educating students to develop these very skills. We are extremely focused on providing education comparable to international standards.

At Arunodaya University, our goal is not only to augment the lives of the students but to prepare them to impact the lives of millions across India and the world.

Wishing you every success in life!
