Academic Framework

The foundation of higher learning at UPES since its inception has been to explore and promote areas of learning that are **innovative and future focused.** This has led to constant evolution in facilitating creative and collaborative learning engagements for students through realignment of curriculum and exploration of virtual tools, and open-source courseware; thereby creating borderless learning and access to limitless information.

The new curriculum framework at UPES, **ABLE (Academic Blueprint for Learning Excellence)** is holistic in its overall structure and yet focuses on the individual need of the student to discover, experience, explore and challenge. The learning is segmented into **core subject studies, core specialism studies, minors/exploratory subjects**, and **signature** and **life skills learning.** The latter three are offered by the newly-instituted **School for Life.**

SFL (School for Life) is an intrinsic part of the composite UPES student experience and facilitates **learning and education that is a balance between what students want, and what is needed of them** as future global citizens and leaders of tomorrow. With courses designed to equip students with lifelong learning skills, a focus on a wide range of contemporary issues, and a mandatory social and professional internship experience that is unique, UPES believes in igniting to inspire the best version within an individual to better the world.
